REQUEST FOR REVIEW BEFORE APPEAL

Sir:

We request that the present application be reviewed in accordance with the Pre-Appeal Brief Conference Pilot Program. This request is being timely filed with a Notice of Appeal. Please consider the remarks presented below.

REMARKS

In the Request for Reconsideration filed by the Applicants on July 6, 2005, Applicants argue that the present application is directed to measuring parameters between two different waveforms. See the second full paragraph on p. 6. This differs from the prior art, which merely measures parameters on individual waveforms.

With respect to independent claims 21, 28, and 36, Taraki et al. fails to disclose a relationship between the first waveform and the second waveform. See the fourth full paragraph on p. 6 (claim 21), the fourth full paragraph on p. 7 (claim 28), and the paragraph bridging pages 8 and 9 (claim 36).

In the Advisory Action mailed August 11, 2005, the Examiner stated in the second full paragraph on the continuation sheet that "[t]he term 'relationship' is being interpreted as having some sort of connection" and "the condition of having a relationship is satisfied since the Taraki reference performs the sweep on both waveforms." It is clear that "perform[ing] the sweep on both waveforms" does not

App. No.: 10/606,897 Art Unit: 2863

read on the claims of the present application regarding a <u>parameter</u> defining a relationship between the first waveform and the second waveform. Although the waveforms may be considered to be related in that they are both displayed simultaneously, it is clear that Taraki does not disclose a parameter defining some relationship between the two waveforms, as claimed.

CONCLUSION

Applicant respectfully submits that all objections and/or rejections have been traversed and that the pending claims 21-39 are in condition for allowance. Favorable reconsideration and allowance of the present application and all pending claims are hereby courteously requested. If, in the opinion of the Examiner, a telephonic conference would expedite the examination of this matter, the Examiner is invited to call the undersigned at (770) 933-9500.

Respectfully submitted,

Glenn W. Brown
